SPIRITS INDUSTRY DATA ANALYSIS

EXECUTIVE SUMMARY

Questions the Graphs help answer:

- Is the market growing because of more volume or higher value per case?
- How do each category if liquor compare?
- Which countries are fastest-growing or have the most value per case?

Main Idea:

- US market shifting from volume-based growth to value-based growth.
- Premiumization and higher-value categories are becoming more important than cases sold

Key Points on graphs:

Min, Max, 2019(pre-pandemic), 2026 and 2030 forecast

US MARKET BASELINE: TOTAL SPIRITS VALUE TREND

Shows scale and direction of U.S. spirits market as a whole

Insights: although the total value is currently falling, it should level out soon and has shown an overall upward trend

US MARKET BASELINE: TOTAL SPIRITS VALUE YOY GROWTH

Highlights volatility.

Questions:

- **Is growth sustainable?**

Insights:

Since 2023, we haven’t seen much growth

US MARKET BASELINE: TOTAL SPIRITS 5-YEAR CAGR

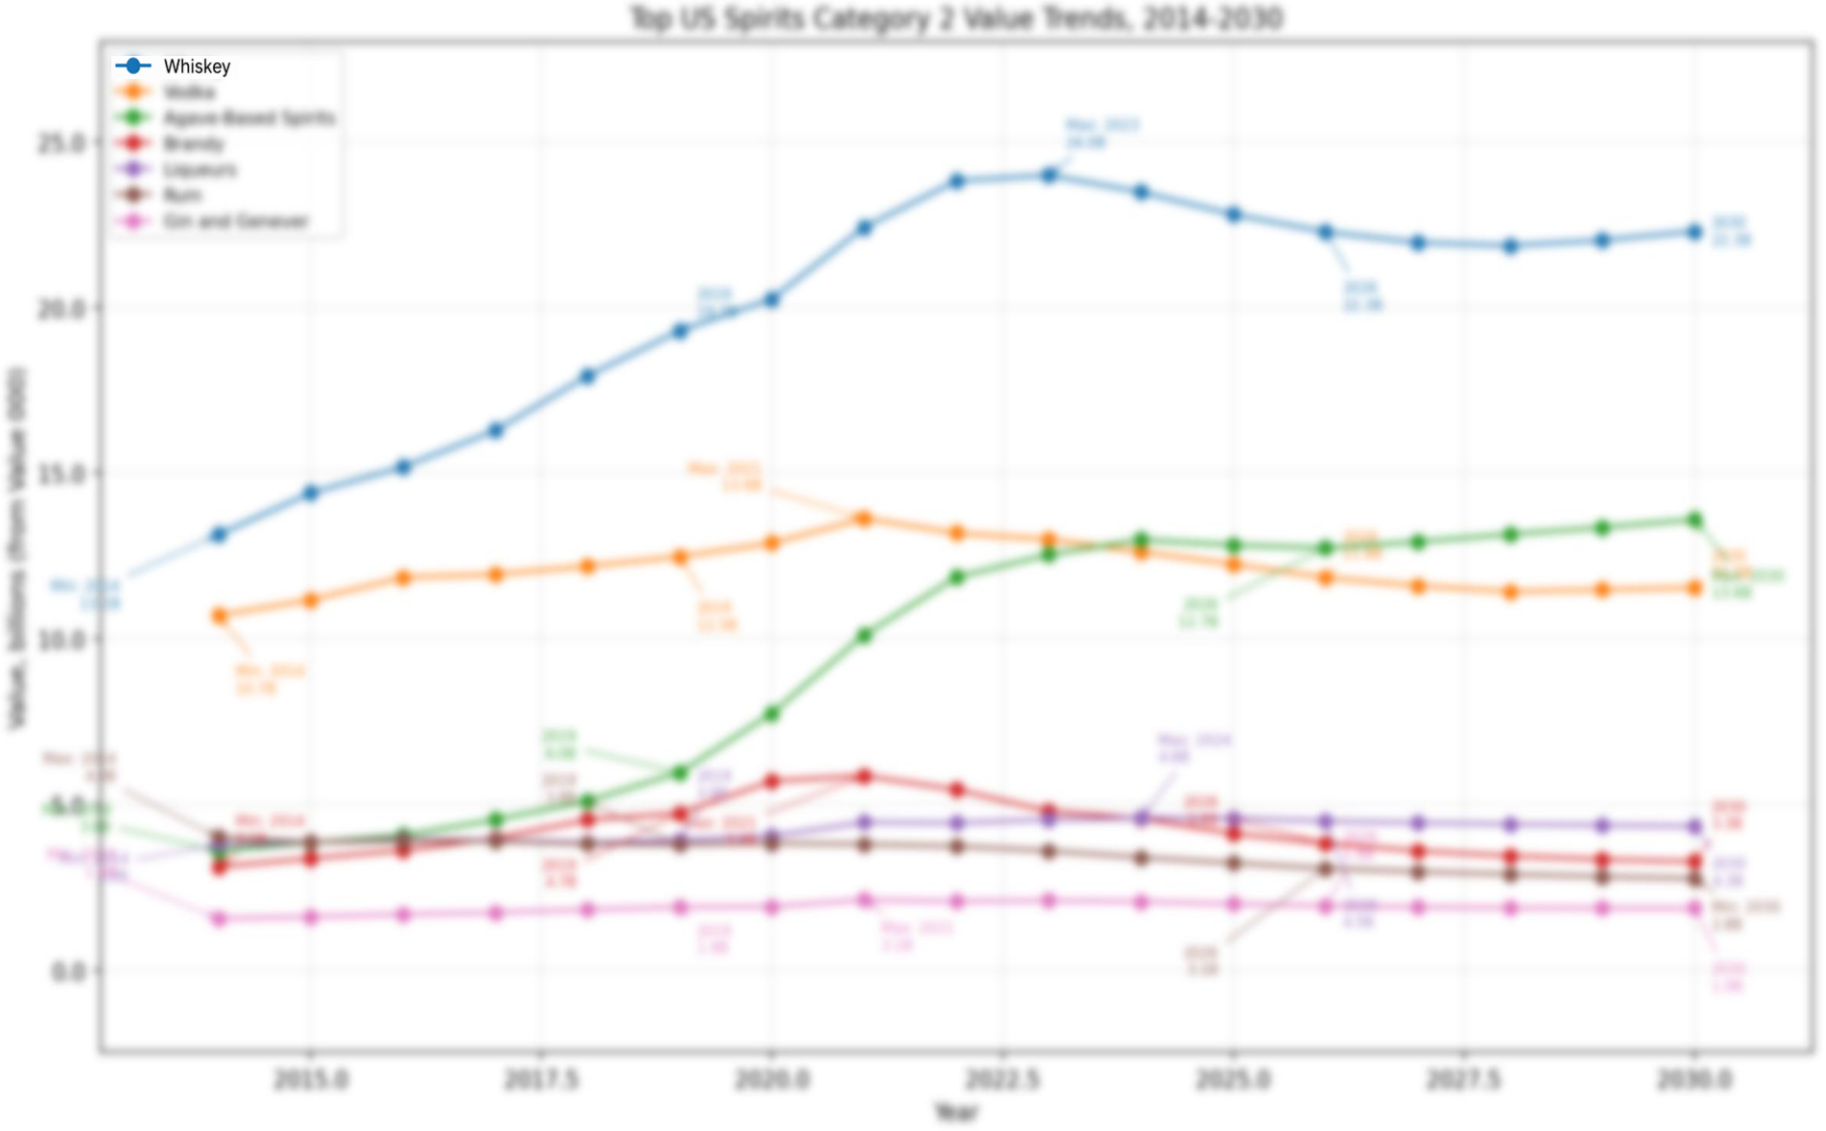

CAGR smooths annual swings.

Questions:

- Is growth sustainable?

Note: max value [redacted] due to rounding. Looks to be around [redacted] min around [redacted]

US CATEGORIES: VALUE TRENDS

Compares trajectory of each category.

Agave is main outlier in downward trend. Whisky also seems healthy.

US CATEGORIES: INDEXED CATEGORY GROWTH

Starts every category at one point to show how each category grew/declined since [redacted]

Agave has had explosive growth while whisky and liqueurs are steady

VALUE VS VOLUME: US INDEX

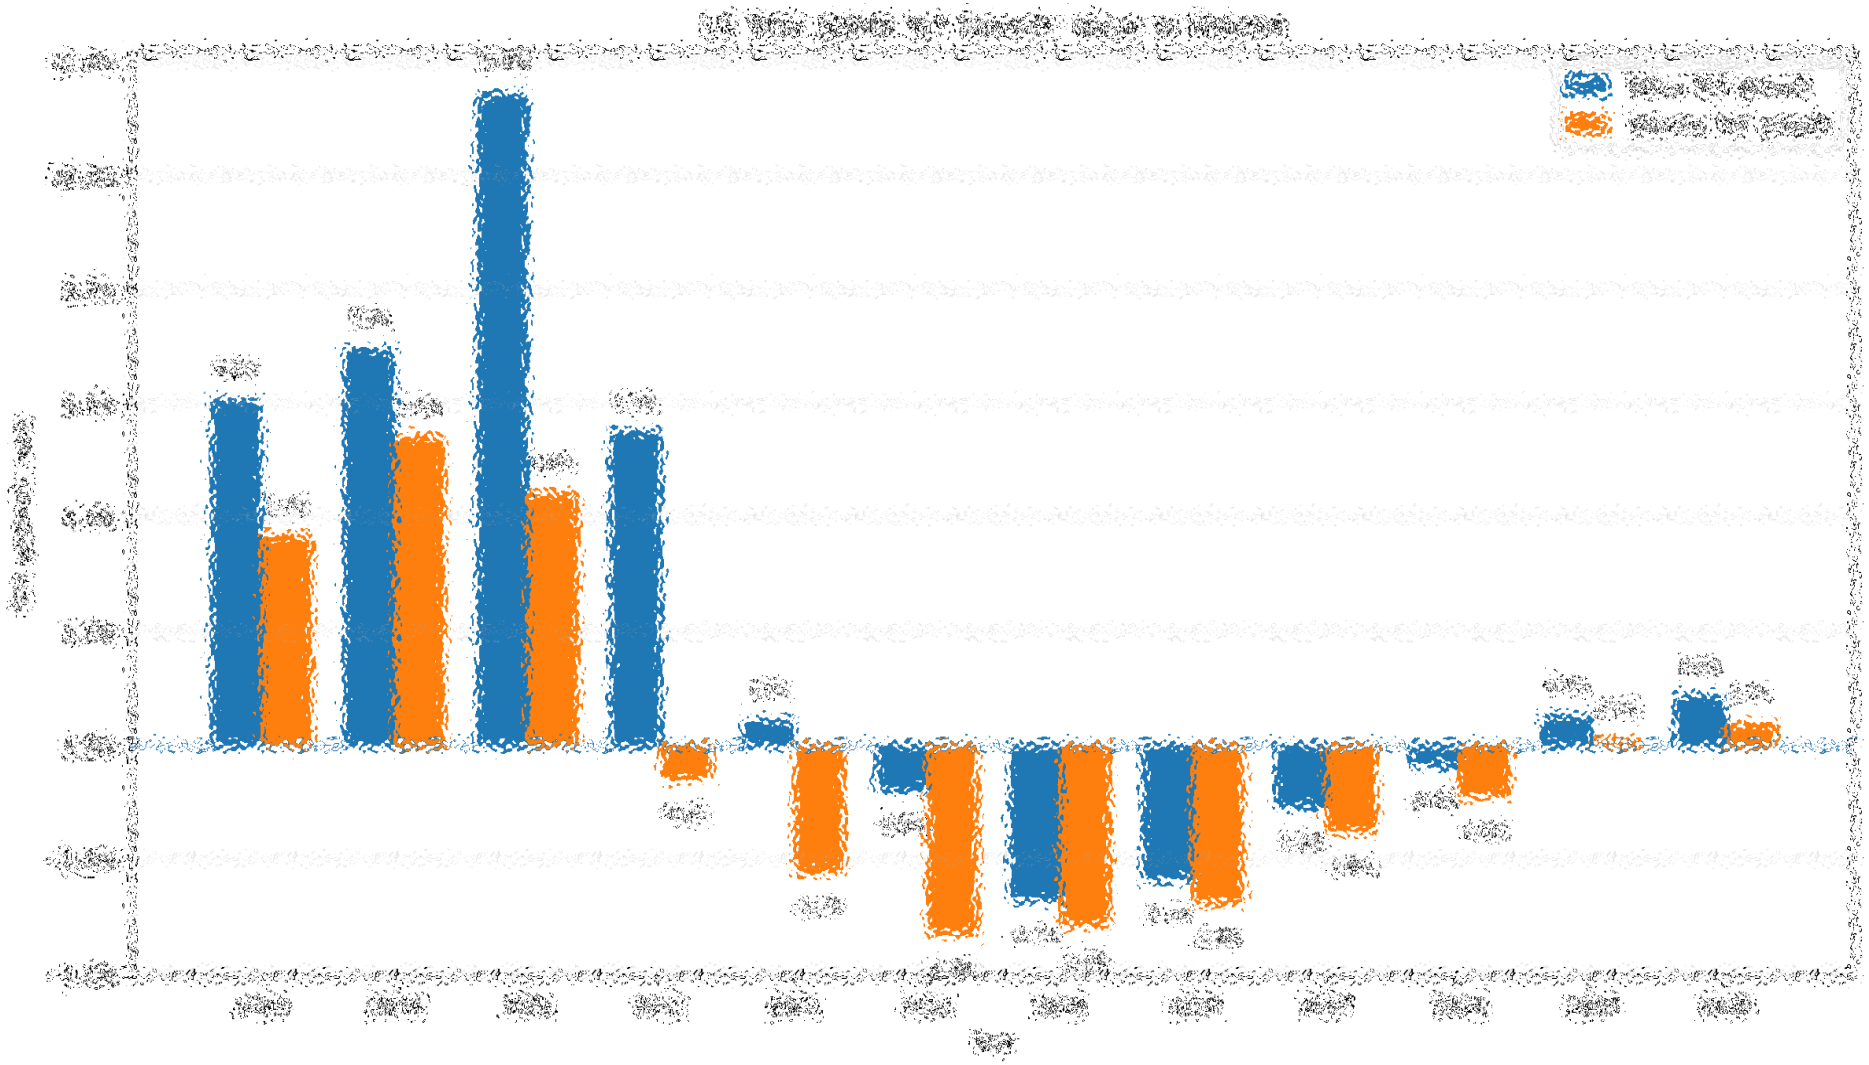

Shows if growth is coming from cases or value per case.

Based on the index, we can see the value is growing at a higher rate than volume.

By [redacted], Value will grow by [redacted] while volume drops [redacted]

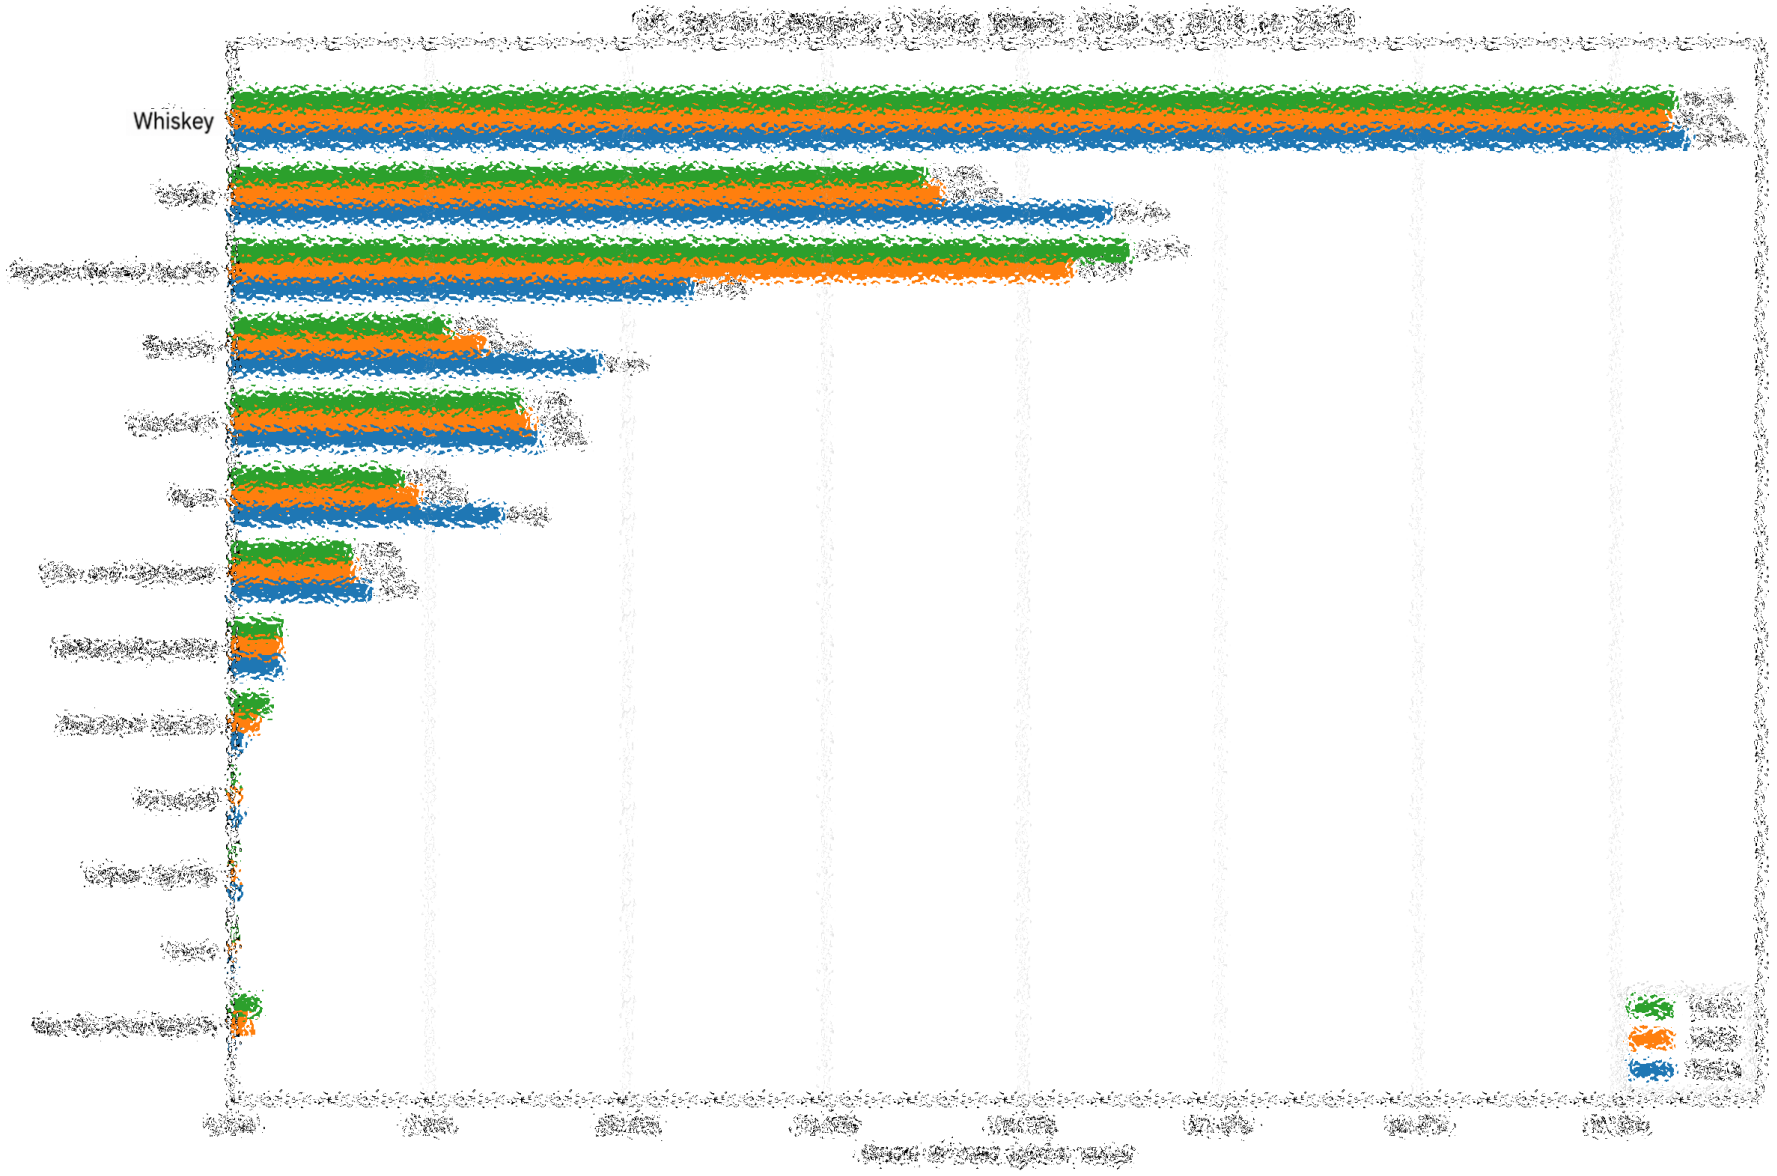

VALUE VS VOLUME: US YOY GROWTH

Should we focus on volume or value-lead positioning in each period?

Value outperforms volume in YoY growth every time.

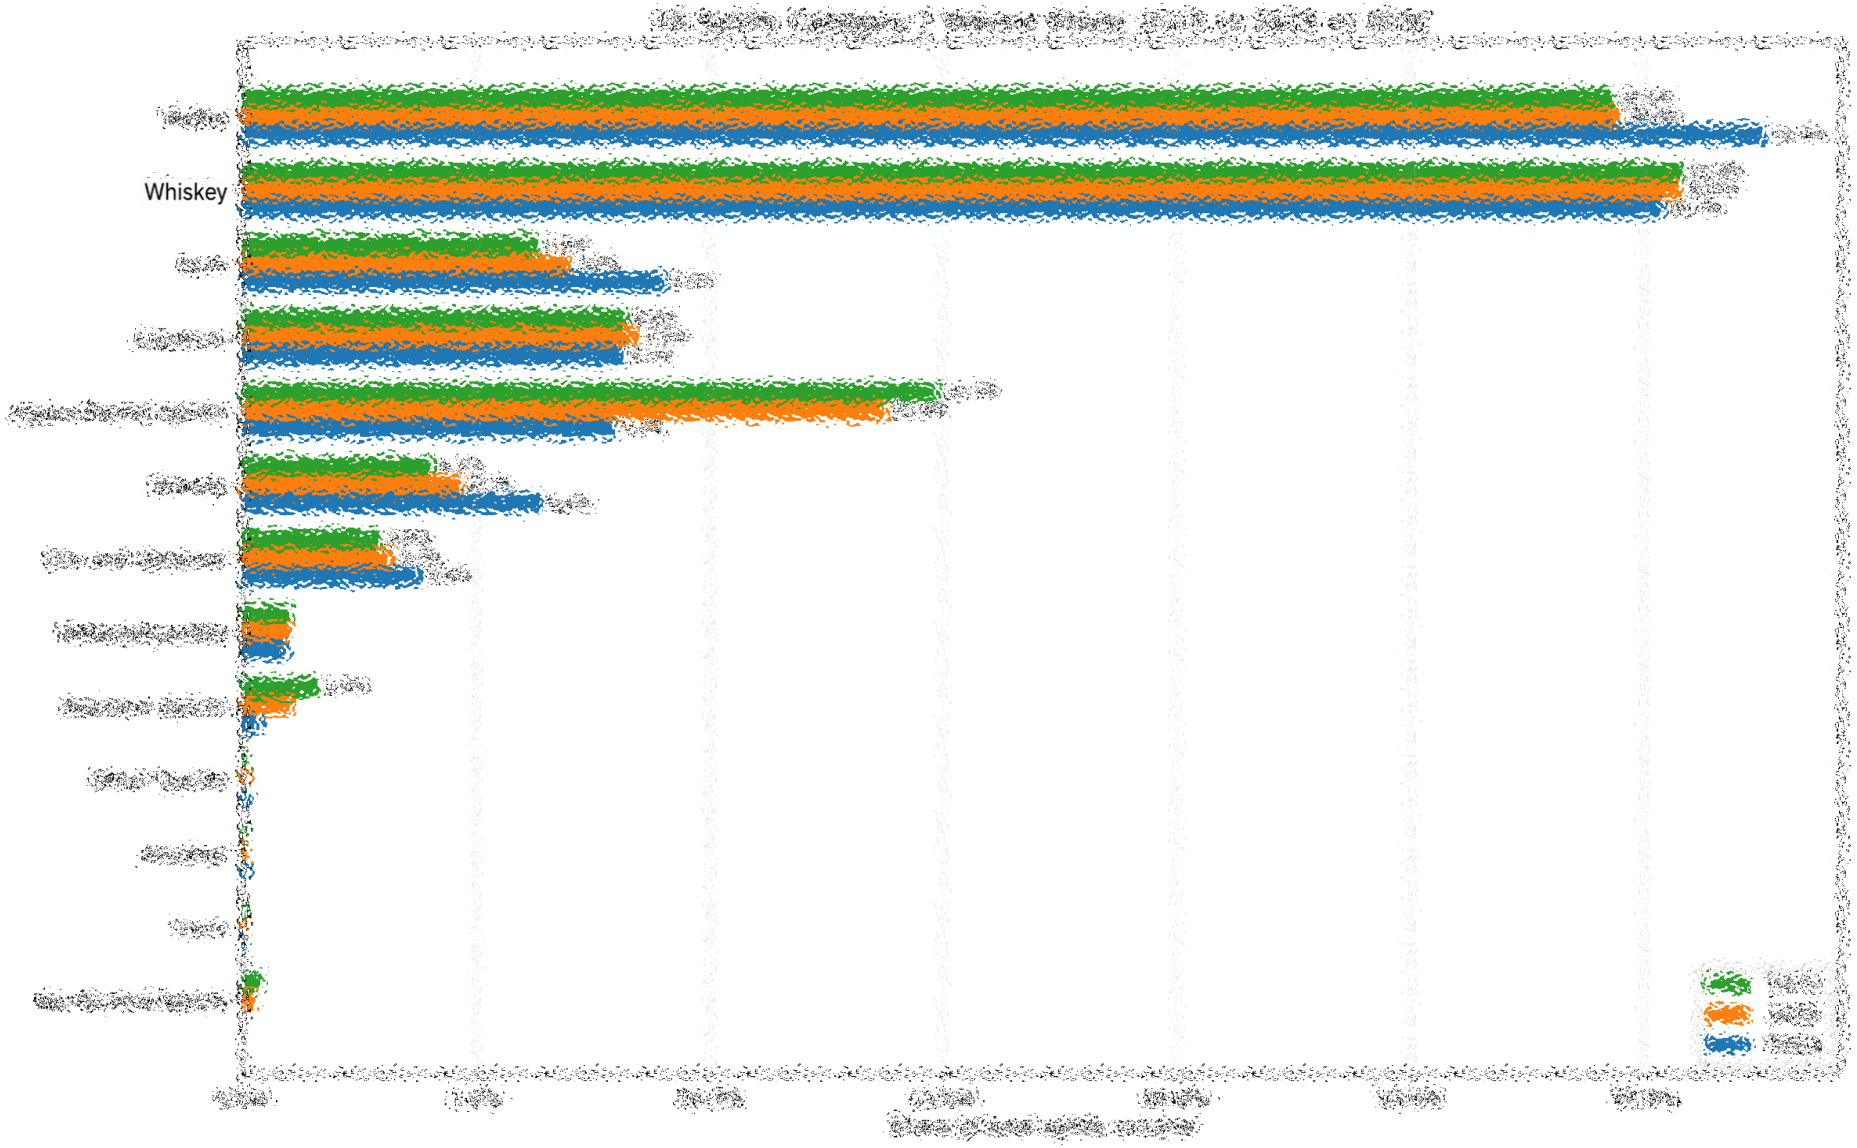

US CATEGORY VALUE SHARE

Benchmarks of each category against each other.

Agave seems to be the biggest grower while Vodka, Brandy, and Rum seem to be going the wrong direction

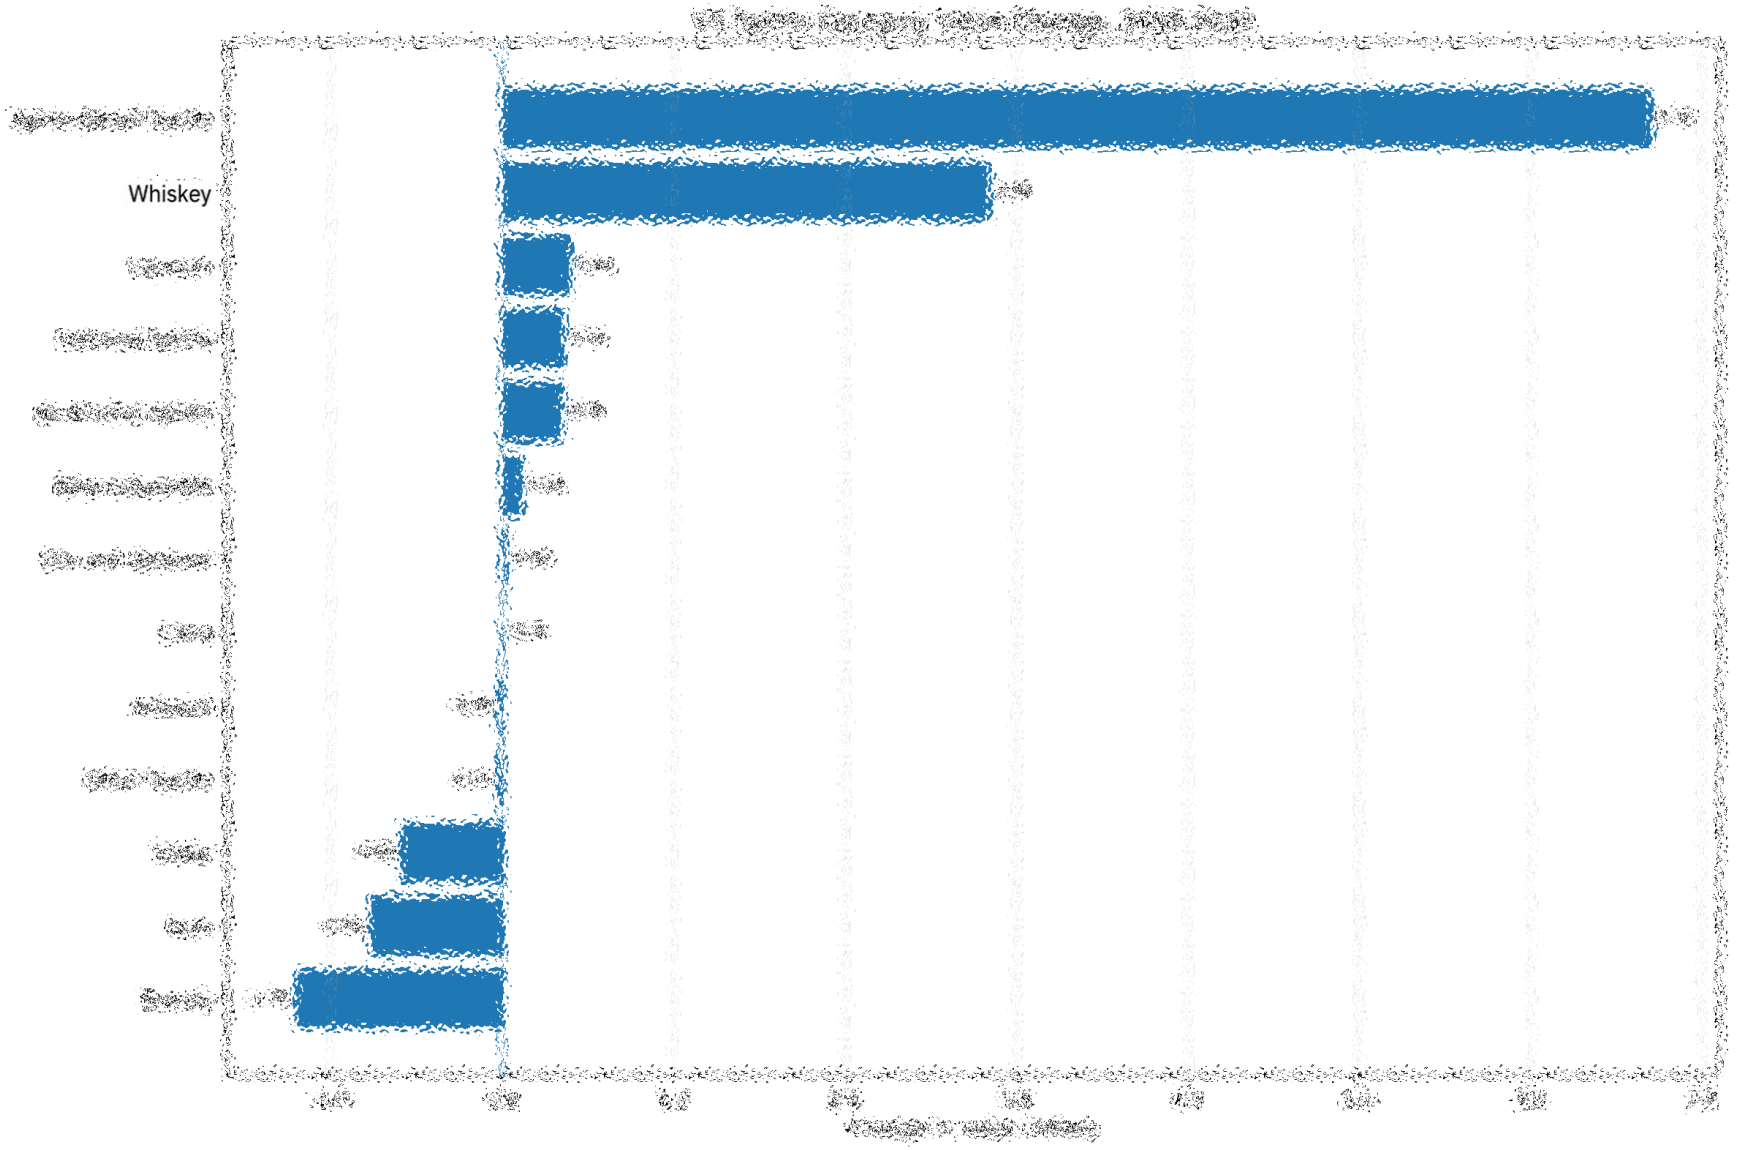

US CATEGORY VOLUME SHARE

Volume share for comparison with value

This shows that Vodka has a very high volume share but lacks value. Whiskey has high value as well as volume.

US CATEGORY VALUE CHANGE

Shows which categories are gaining the most value from [redacted]

Agave has changed the most while whisky is also looking healthy

US WHISKY SUBCATEGORY TRENDS

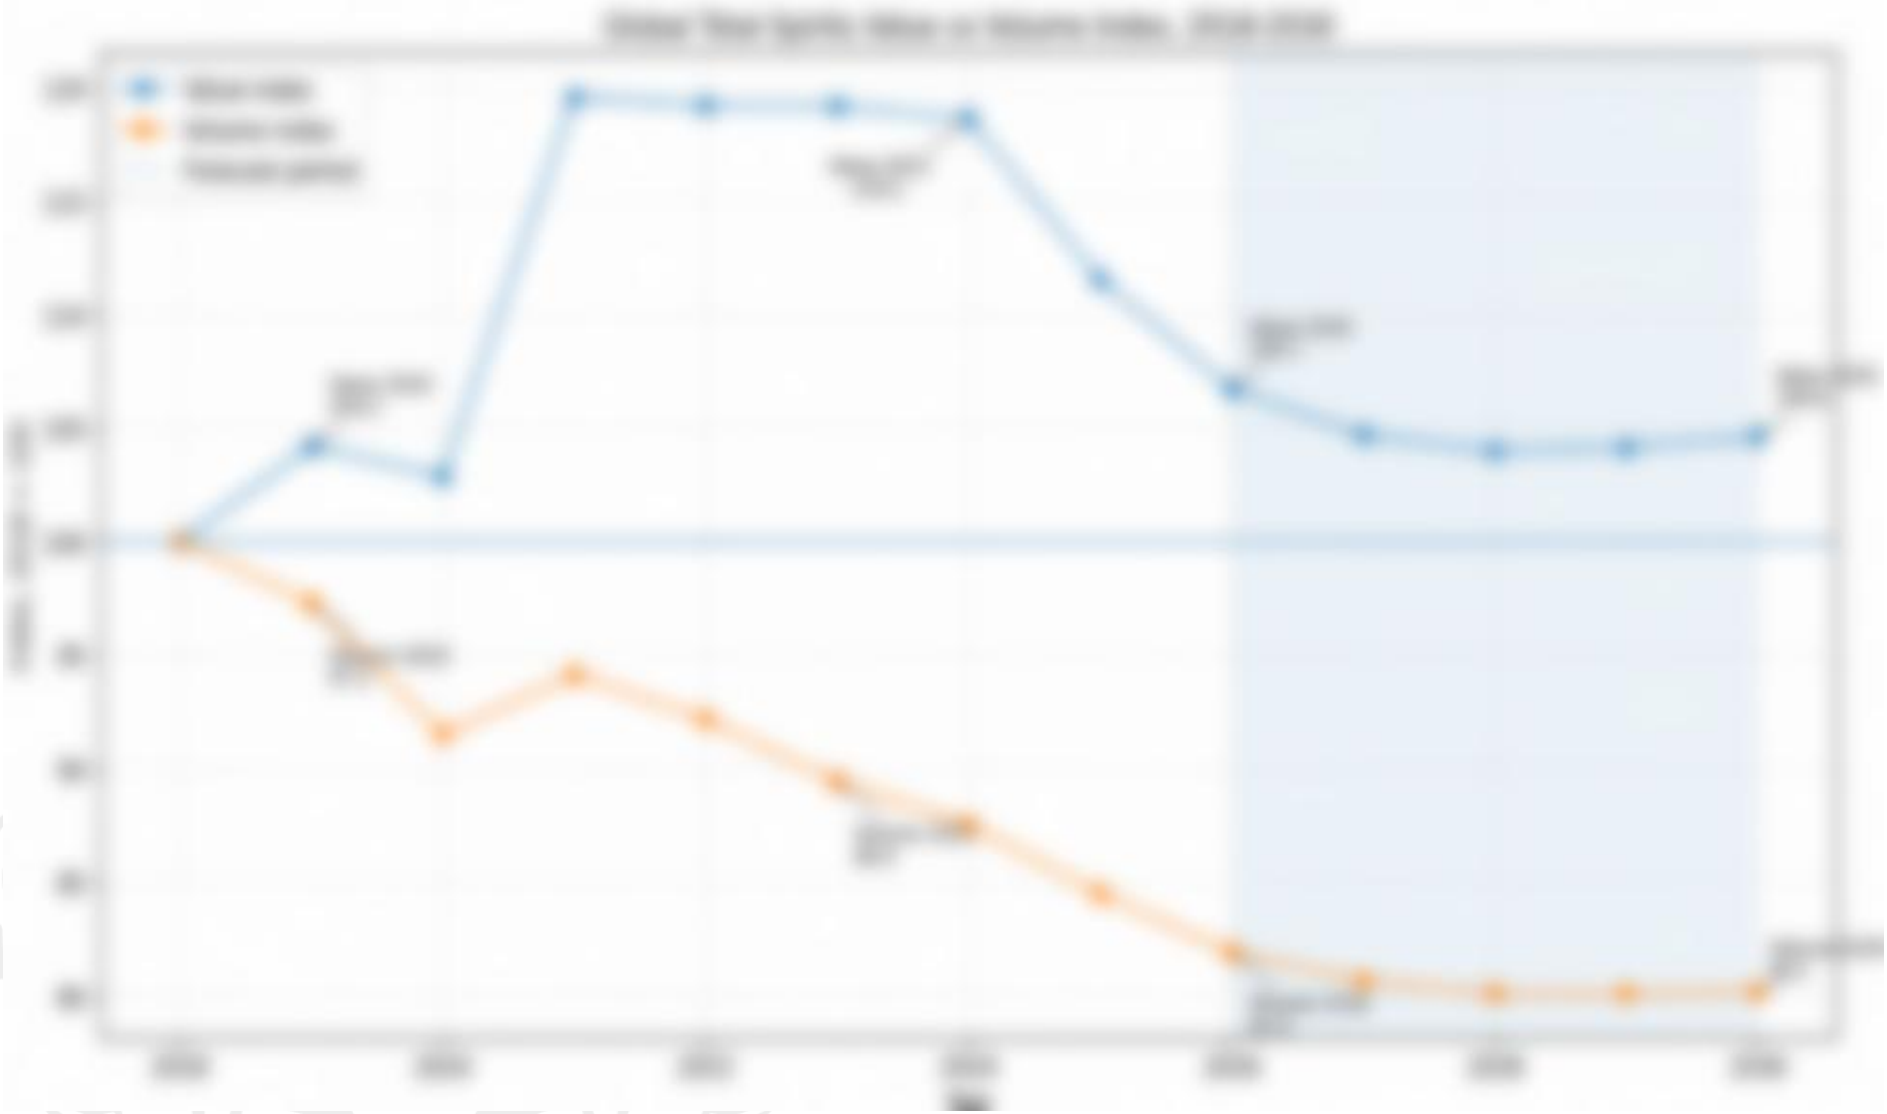

More useful for Sagamore. The U.S. Whiskey outperforming the others looks promising.

GLOBAL DATA

GLOBAL VALUE VS VOLUME INDEX

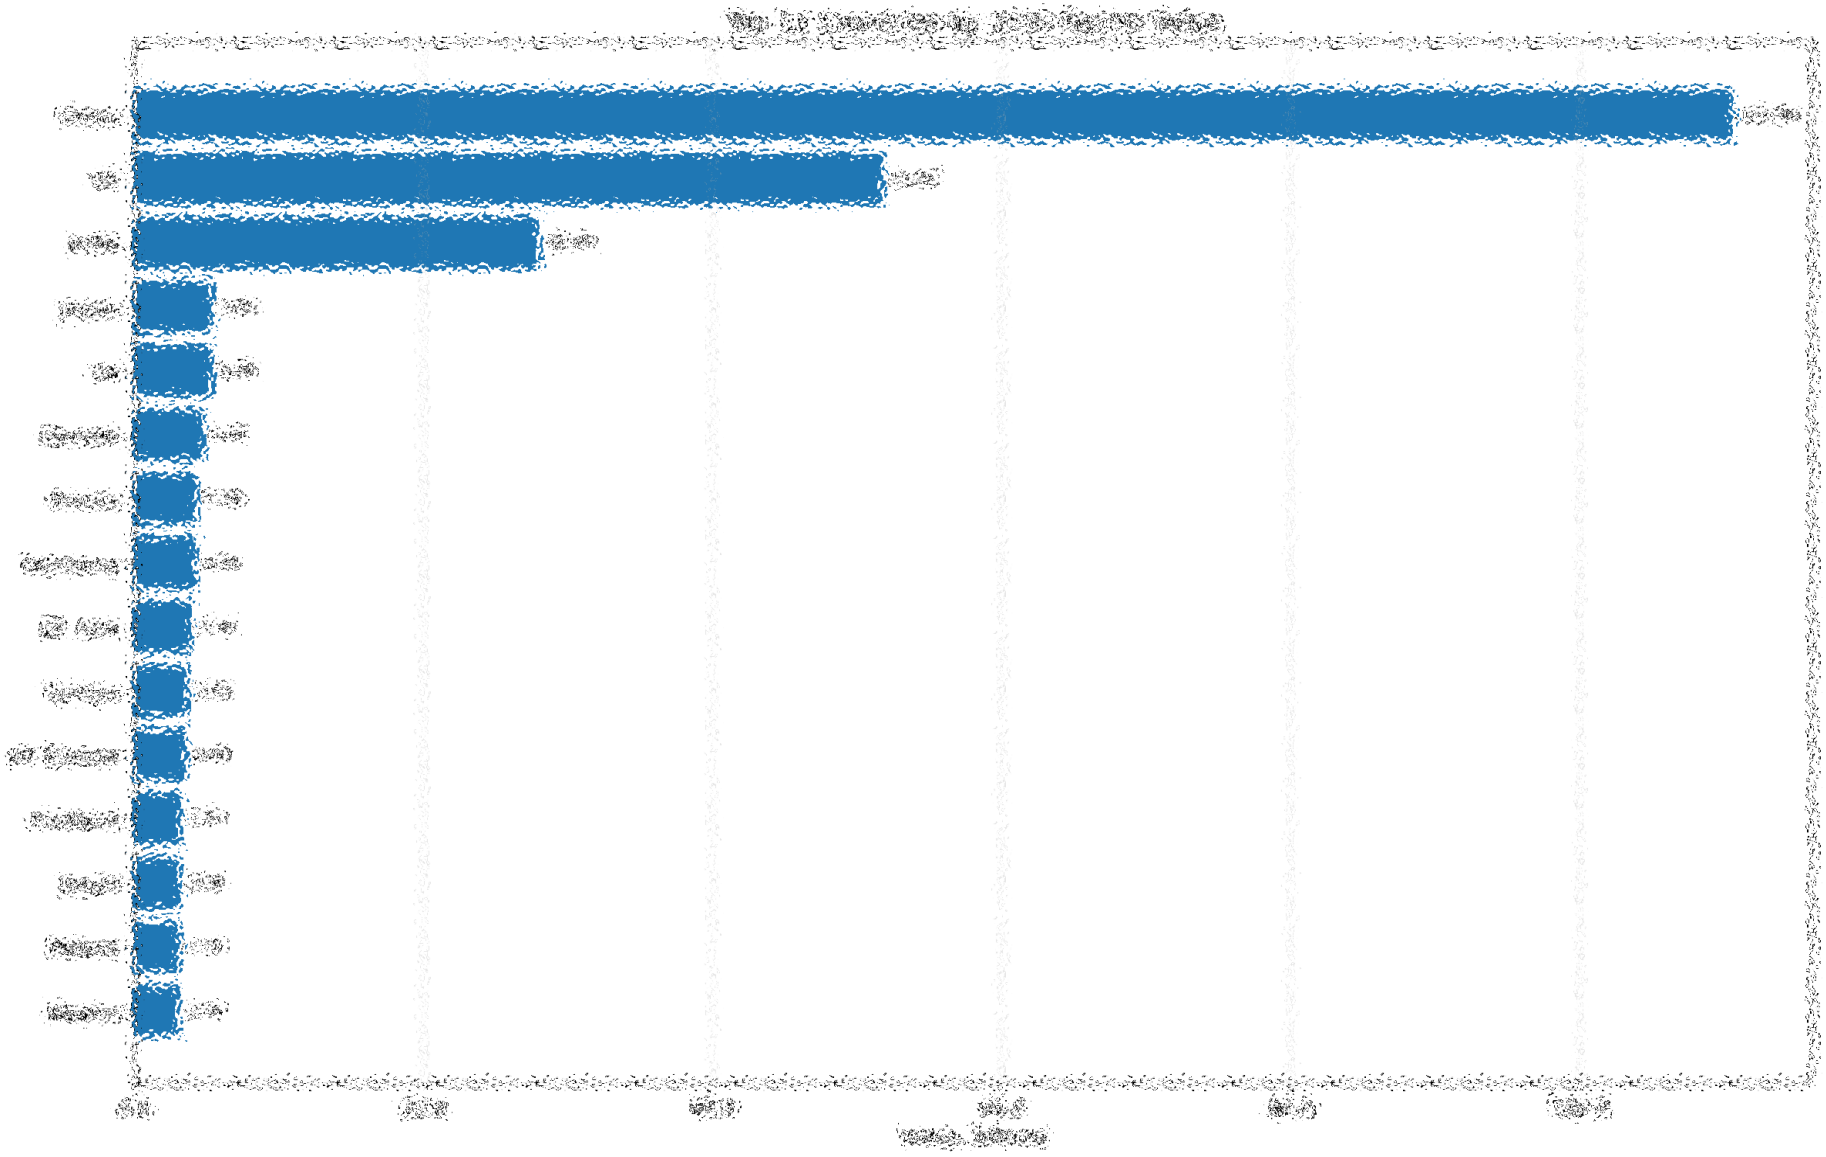

Shows global premiumization

Globally, the value has increased less compared to the U.S., and the volume has decreased more as well

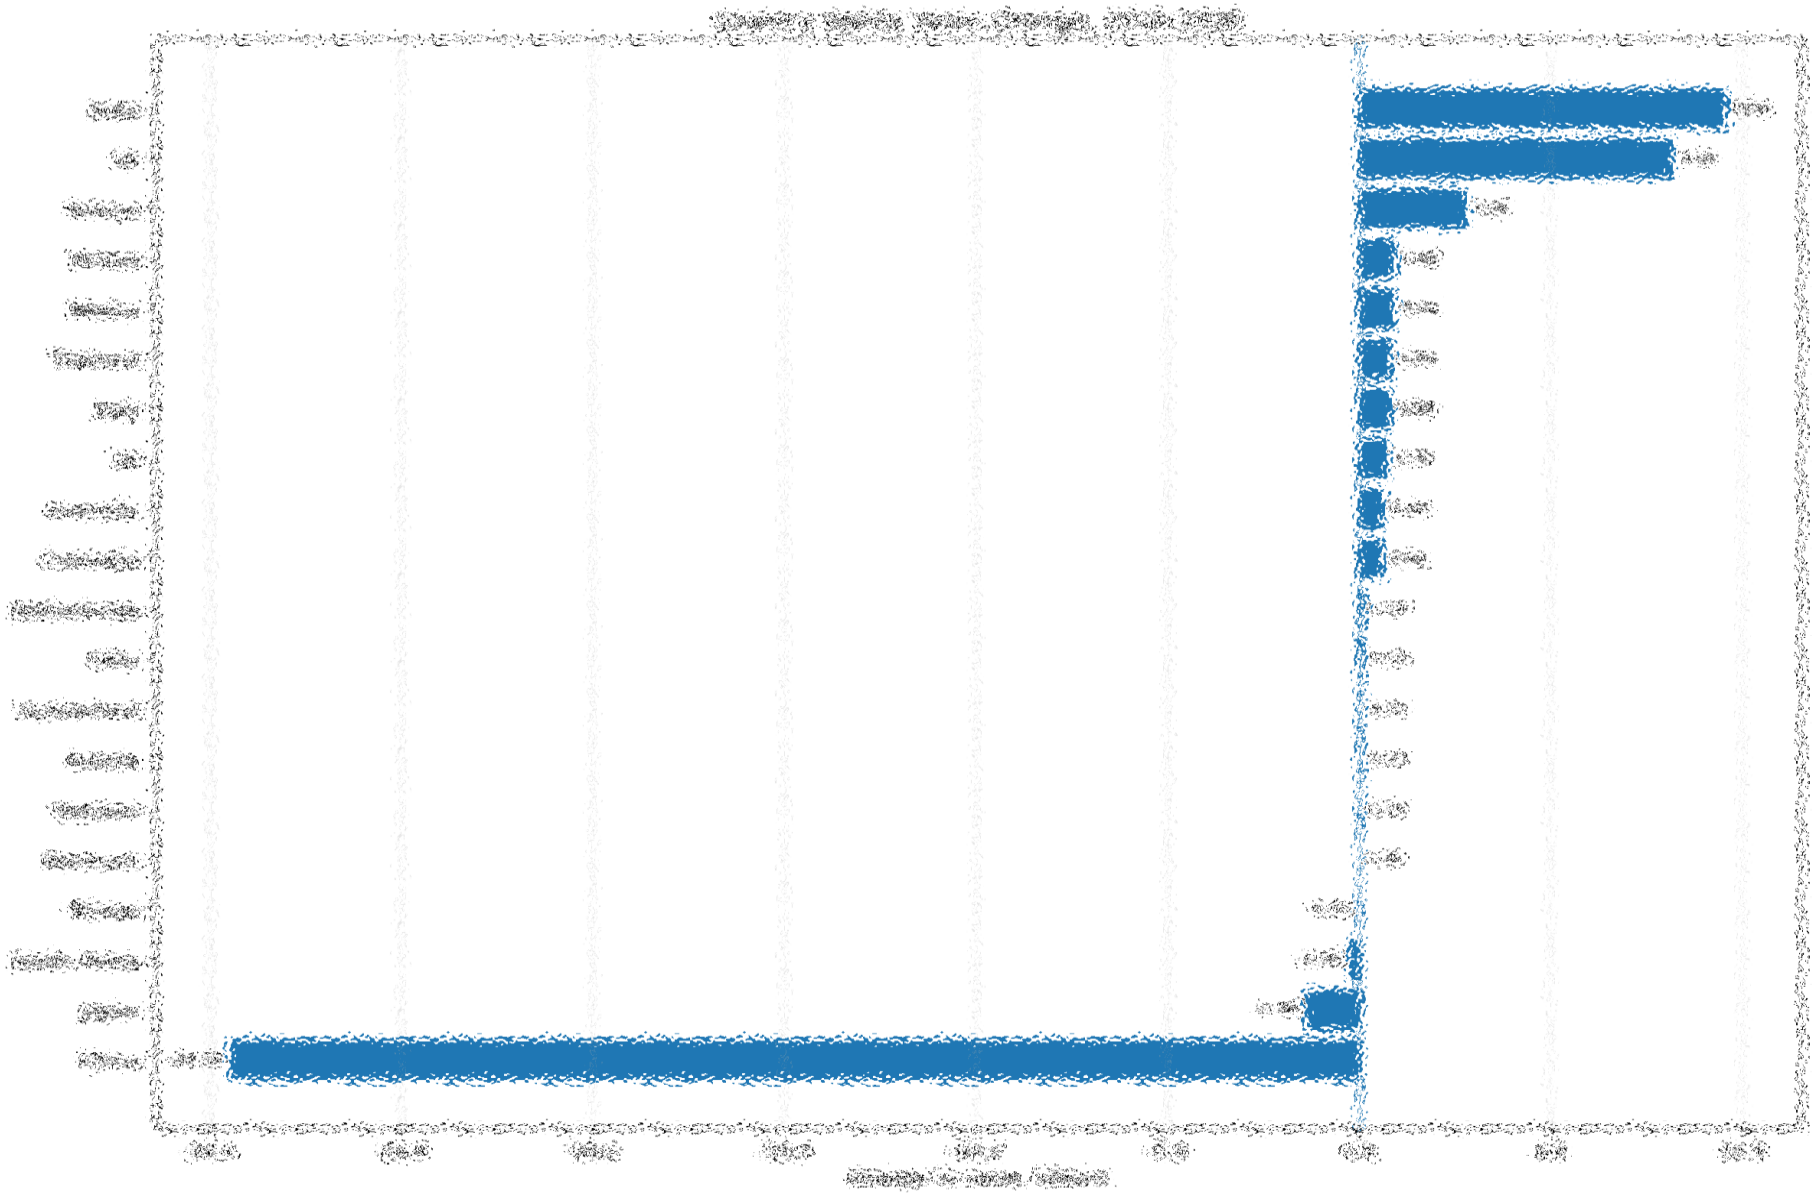

(U.S. is beating global market)

TOP 15 COUNTRIES BY 2030 VOLUME

Identifies largest value pools for distribution

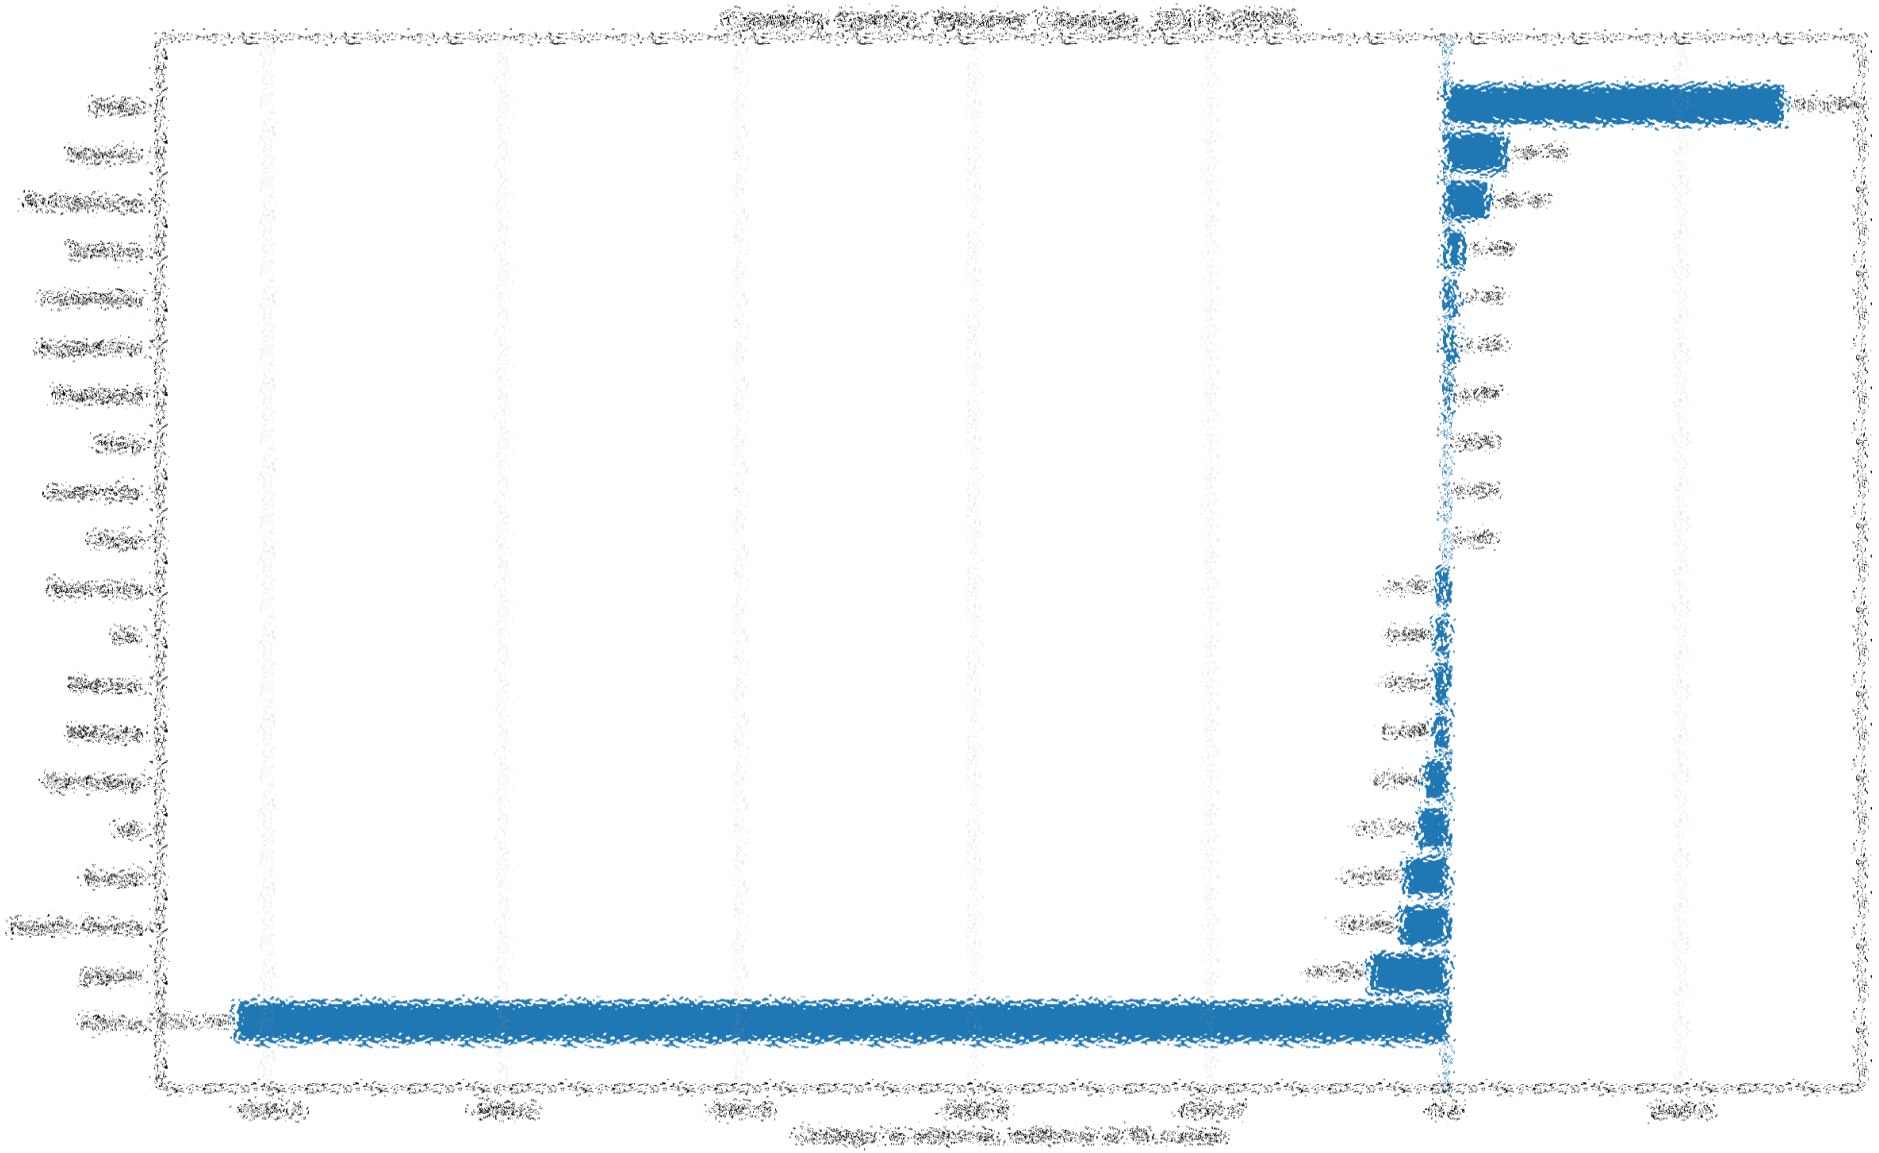

COUNTRY VALUE CHANGE 2019-2030

Shows where largest incremental value is expected.

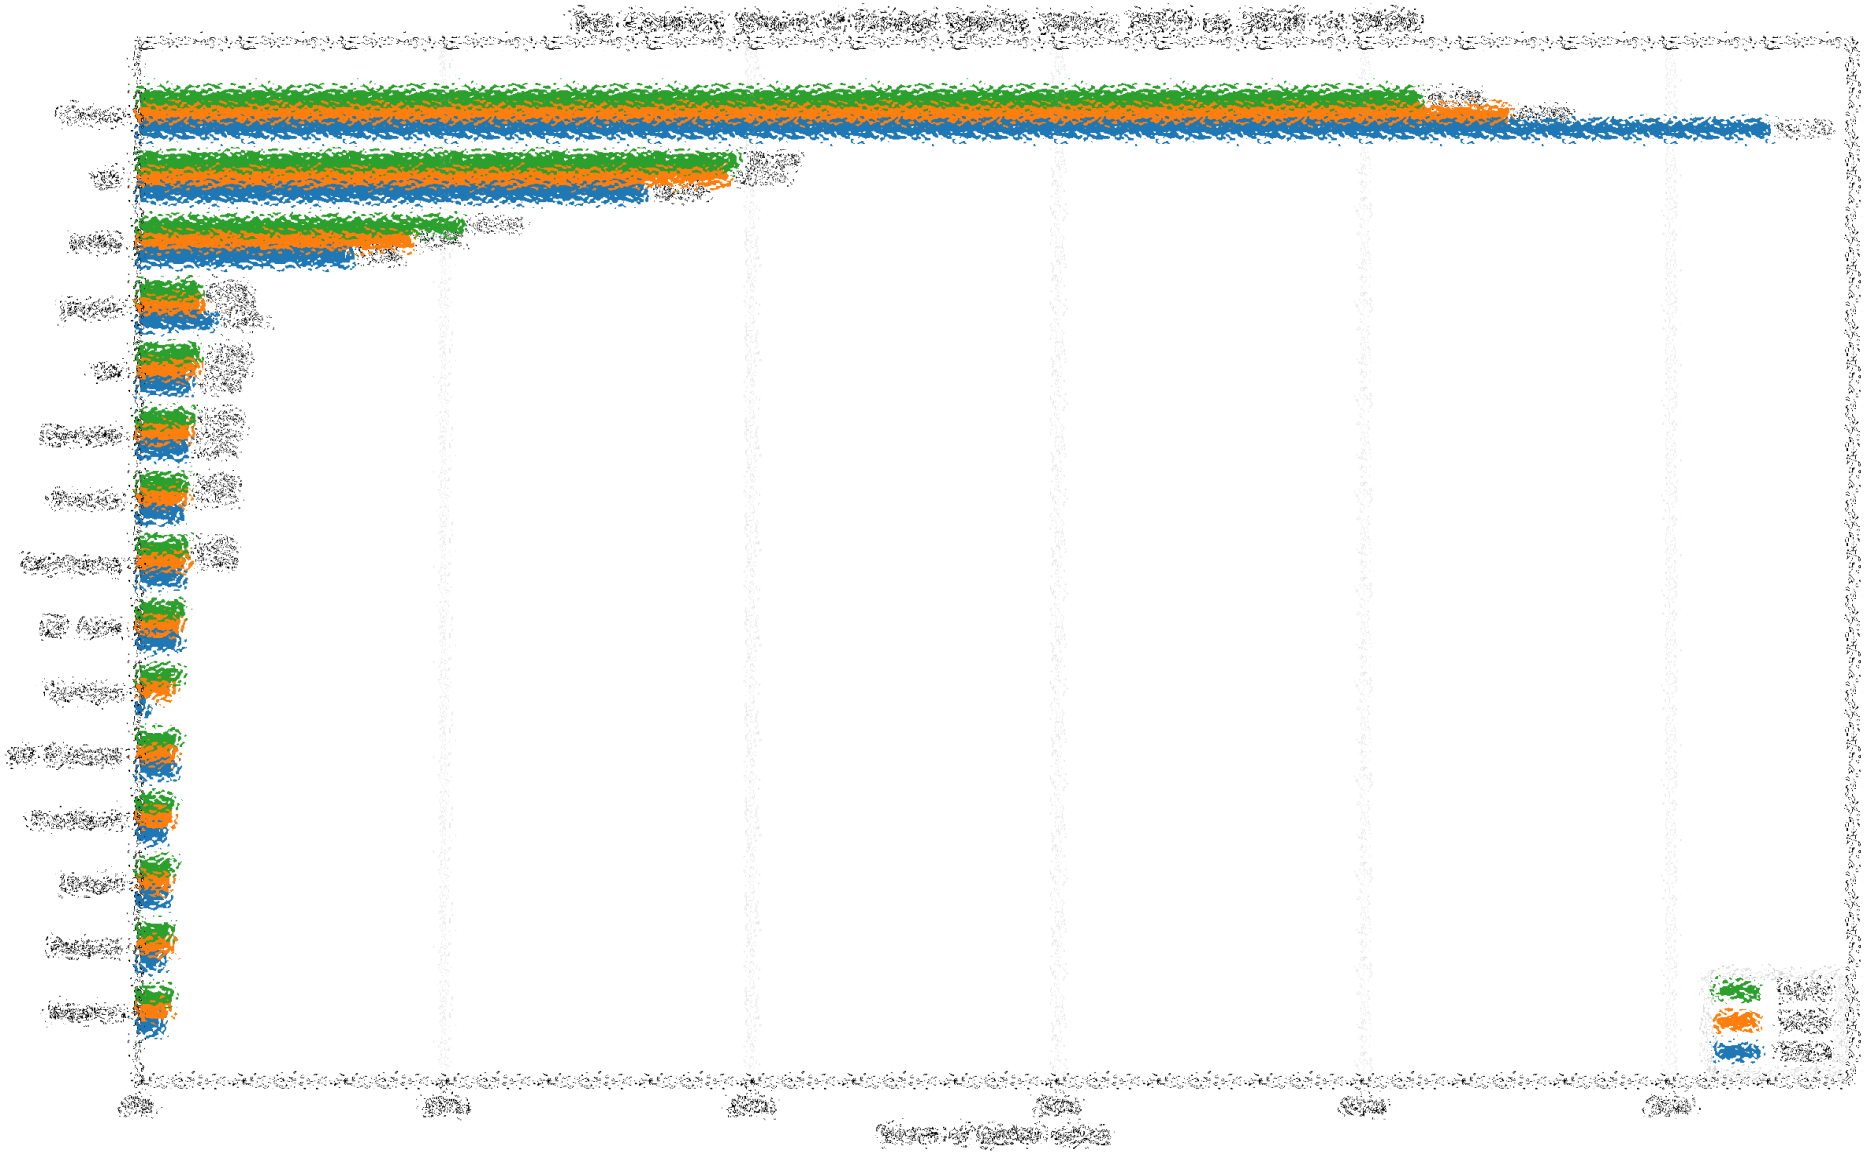

Although China is the largest market, it is shrinking the fastest.

COUNTRY VOLUME CHANGE 2019-2030

Shows whether market growth is relative to more cases or mainly value.

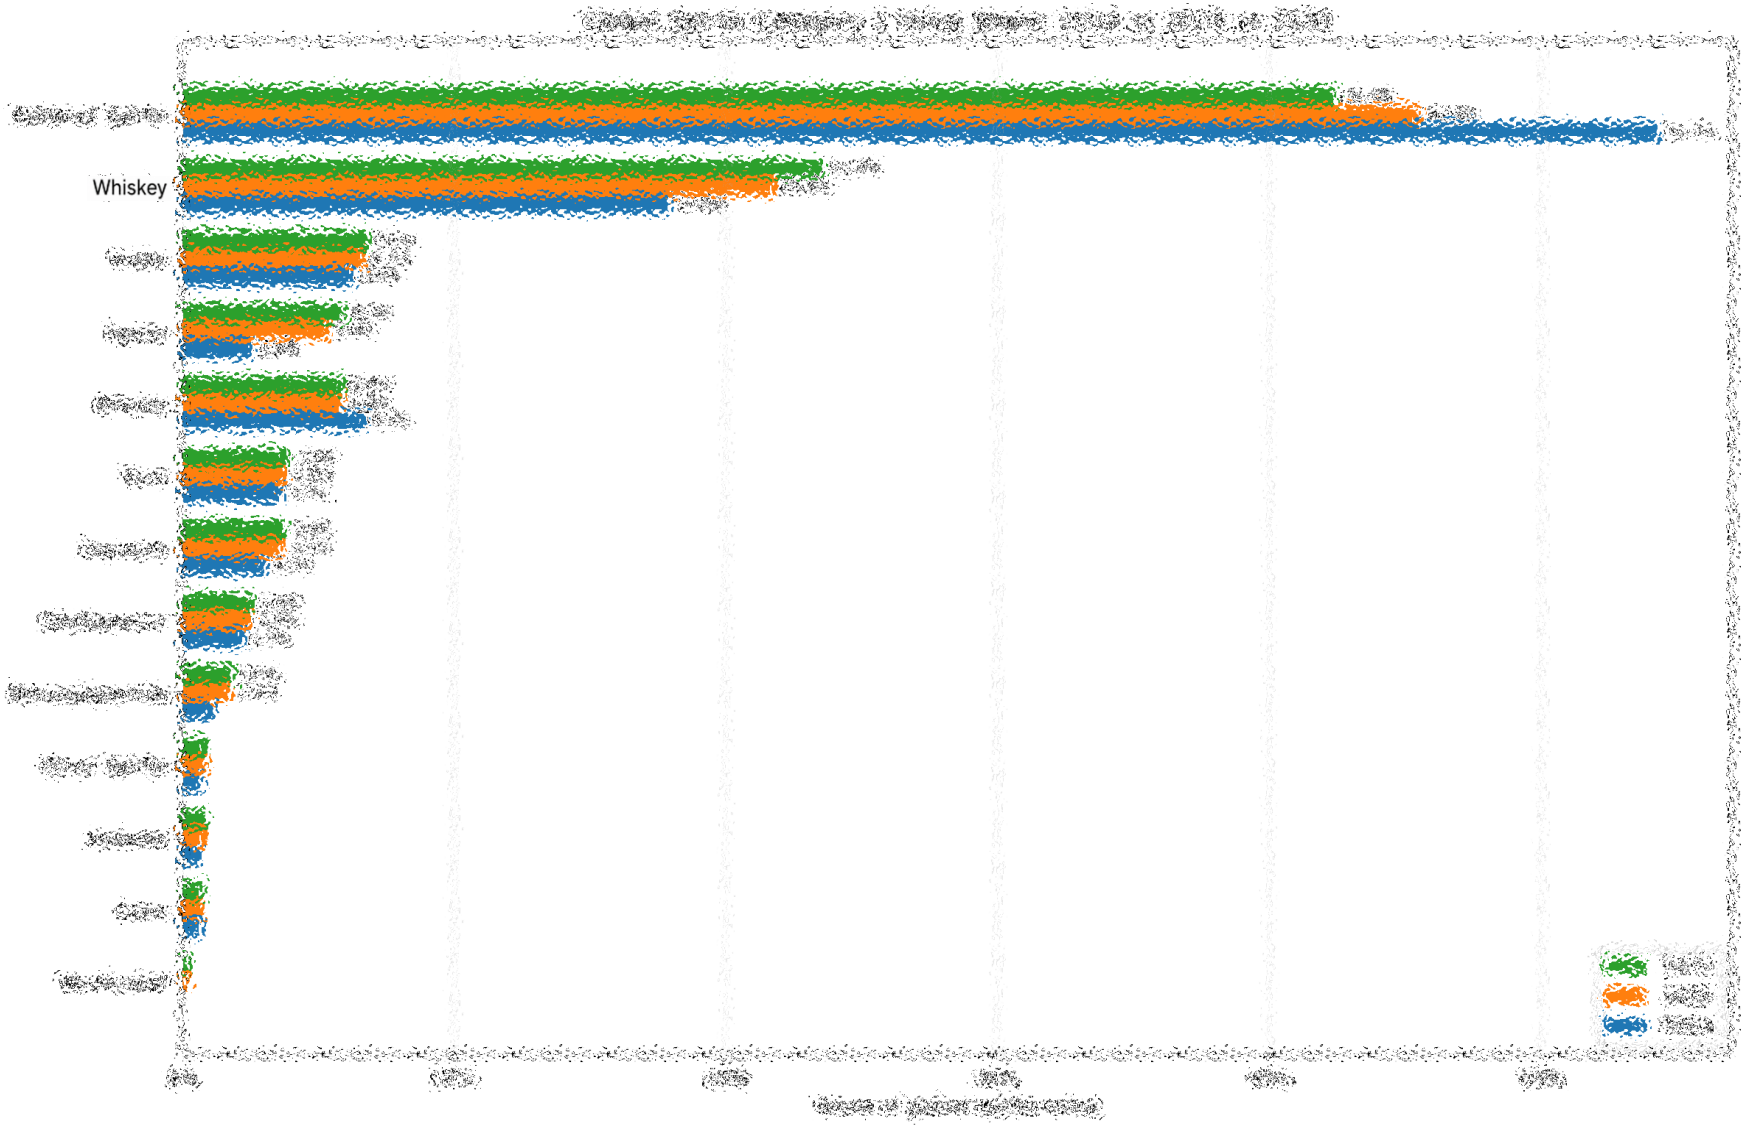

COUNTRY SHARE OF GLOBAL VALUE

Shows markets gain/loss of relevance.

China is still dominating the market but will continue to shrink.

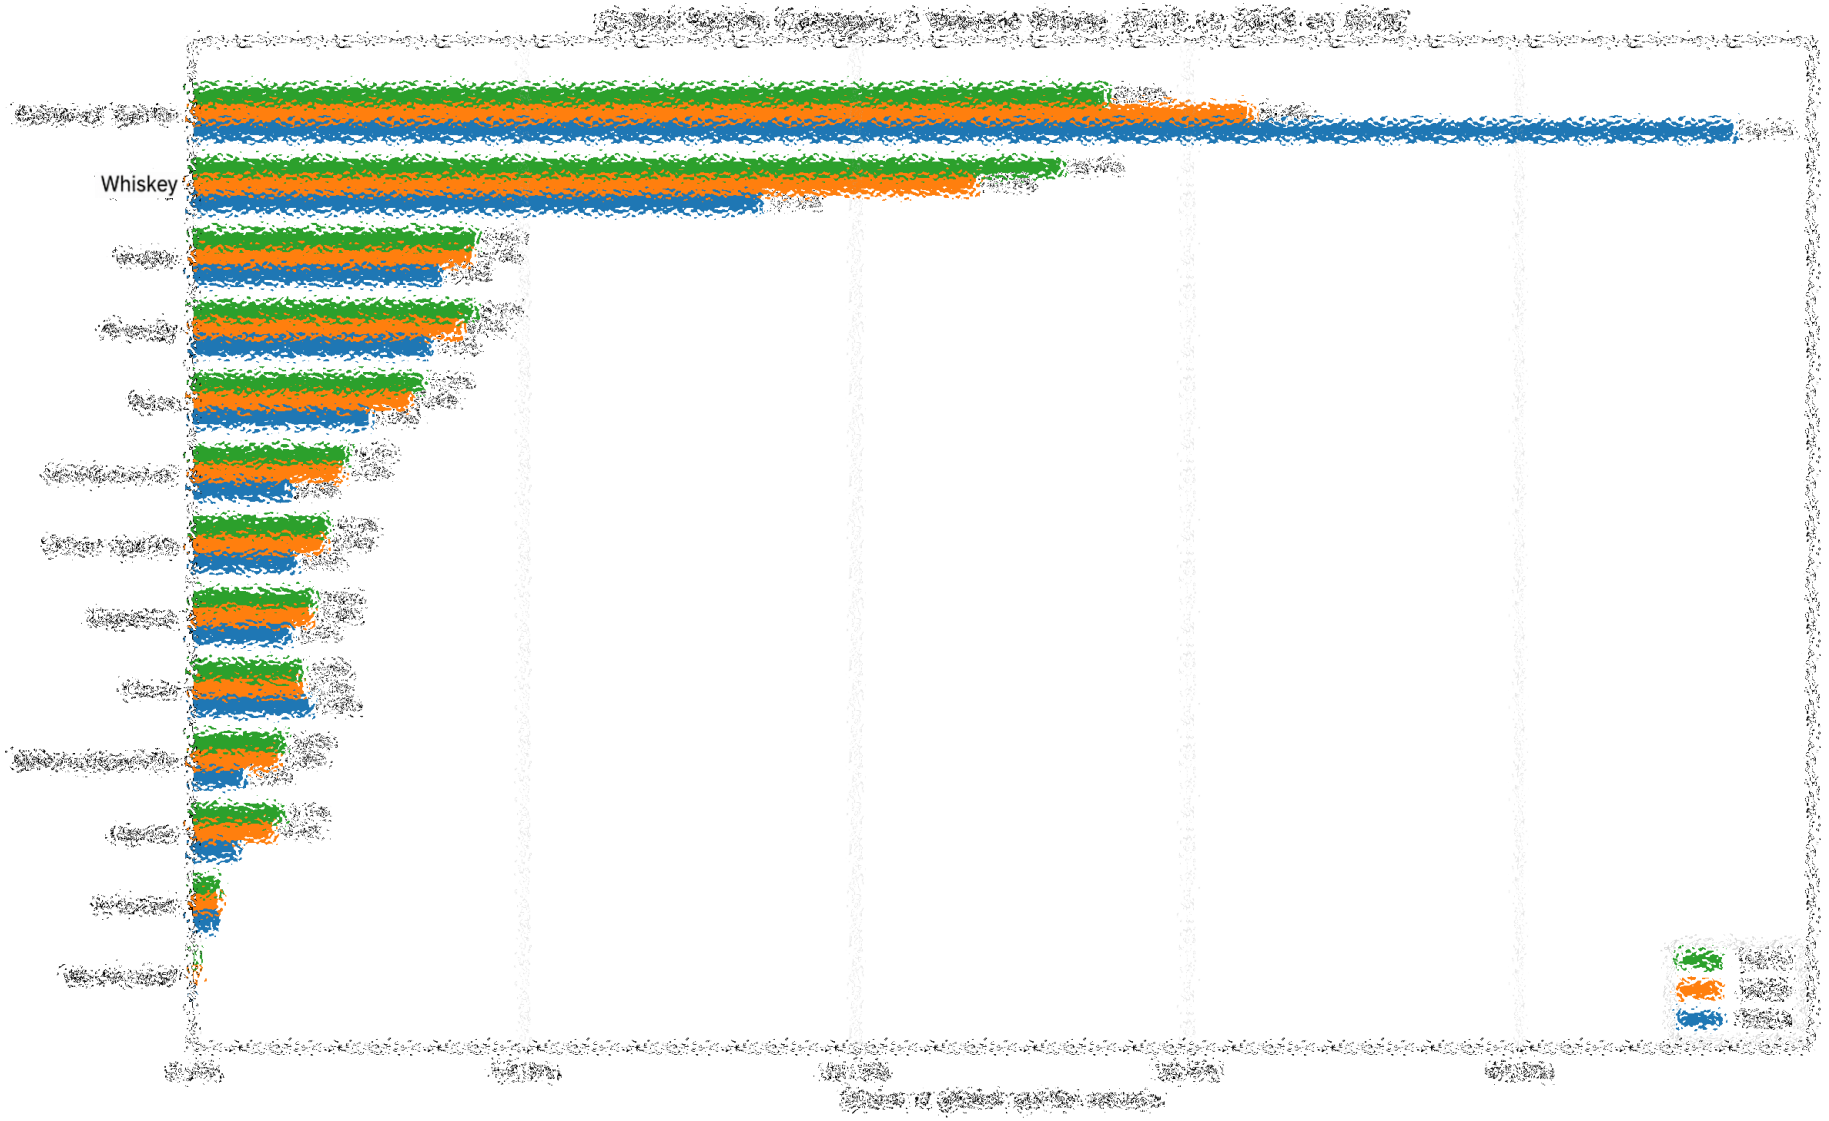

GLOBAL CATEGORIES: VALUE SHARE

Shows categories value share across the world rather than just U.S.

Both whisky and liqueurs are gaining traction; good news for us

GLOBAL CATEGORIES: VOLUME SHARE

Shows categories volume share across the world rather than just U.S.

CONCLUSION

The main takeaway is that although we see the volume of the spirits industry shrinking, there is still a slight increase in value overall. This may mean that it is a good idea to focus on margins per case, rather than emphasize sales quantity. It also seems like the whiskey market is the safest market that we have in our portfolio, with both U.S. (Sagamore) and Irish (The Busker) whisky being safe subcategories.

New venture opportunities: TEQUILA!!!!!
